### Weekly Summary

Compared to last week's market, the front-end of the feeder steers and heifers on all weight class average prices ended from \$2 to \$4 higher. The slaughter cow and bull figures ended stronger witnessing about \$3 higher.

The negative report about humans contracting the bird flu from infected dairy cows demolished the futures board yesterday and stagnated the feeder market. However the market has such a strong momentum today's board recovered much of the loss and we are continuing to see a strong demand and strong figures.
