Weekly Summary

Compared to last week's market, both feeder steers and heifer prices have witnessed a drop of 35 to 45 cents/lb from last week's figures. The announcement of President Trump allowing more foreign beef imports literally took the futures markets to its knees. In the past 10 days we have witnessed a decline of 37.95 lb on the feeder futures. Analyst felt there was a market correction due, but this correction was much steeper than most projections and triggered by the announcement of imported beef.

Hopefully the markets will bounce back and find a comfortable level.
